

## **TEST PLAN ON HOTELS MODULE OF THOMAS COOK WEBSITE:**

**Test plan identifier** = tp\_hotels\_thomascook\_2025\_v1

**Introduction** = Validate hotel search flow with location, dates, guest/room inputs. Show results for valid data, error for invalid/missing fields.

**Test items** = Hotels tab, location field, date pickers, guest/room selector, add room button, done button, search button, hotel deals, last-minute deals, search history

**Features to be tested** = Location input, date logic, guest/room selection, redirection to results, deals visibility, responsive layout, URL and title check

**Features not to be tested** = Booking process, pricing logic, room availability, backend APIs, chatbot, support system

**Approach** = Manual UI and functional testing; automation via Selenium WebDriver, TestNG, POM, Cucumber, Apache POI

**Item pass/fail criteria** = Pass if valid inputs load results and UI works correctly; fail if redirection, input, or UI breaks

**Suspension criteria and resumption requirements** = Suspend if Hotels module/site is down; resume once stable

**Test deliverables** =

- Test Plan
- Test Scenarios
- Test Cases
- RTM
- Test Report
- Bug Report

**Environmental needs** = Windows 11, Excel, Chrome, Firefox, stable internet

**Responsibilities** = KOTHAPALLI SUMALATHA

**Staffing and training needs** = Selenium WebDriver

**Schedule** = 01/09/2025

**Risks and contingencies** = No risks

**Approvals** = VISHALI SONANIS
